GALA COCKTAIL and DINNER
(Open – Mandatory Reservation)

Saturday 19 Evening

MEMBERS' and SPEAKERS' DINNER,
Venice, (Closed Event)

Dearest Friends,

Dentistry is a composite branch of the Medical Science. The amount of notions is huge, and involve several matters, Anatomy, Physiology, Bio-Chemistry, Physics, Materials, and many more.

The overall goal of our precious IAED Meetings is to increase the Scientific, Cultural and Social gravitational pull toward our energetic international audience.

Always challenging, many Speakers ask to be invited, as now it is matter of honor to lecture at its well-known "The IAED Podium"

All Speakers are chosen because of their outstanding scientific knowledge and unique ability to communicate their topics. In fact, most of them are world renowned Scientists, Faculty Members of prestigious Universities, or honorable Members of the most well respected Societies and Academies.

The leitmotiv 'Lessons' will continue to guide our choices regarding the organization of all Academy Congresses and Reunions.

Hence, I am honored to announce you our V International Annual Congress, which this year will focus on excellent Lessons on the New Digital and Pre-Digital Advanced Aspects of Dental Esthetics.

The aim of this Meeting is to evaluate Dentistry under the light of Modern Procedures, Digital Science and the powerful wave of new Technology, bringing at the Podium the latest Digital developments and advancements in this Field, and comparing them with the traditional Pre-Digital ways.

The gorgeous Villa Tramonti, the ancient and safe H. Hemingway shelter at the end of World-War I in 1918, and the excellent Congress Center will provide perfect conditions for our Meeting, before, during and after this well-known Event. All Speakers, as well as participating Professionals and their families will enjoy their staying.

The Sogedin Hotels and its Staff, as well as the outstanding food and wine, will make the overall unique. Looking forward to seeing you all there soon!

Lino Calvani

IAED President

Scientific Program

Friday September 18, 2015

08.00 Meeting Registration.
